INSTRUMENTS

# pH Electrode Sensor Combination Probe

## PONPE 512PH

- pH Electrode is an economical combination pH electrode, used for measuring the general liquids.
- Plastic combination pH electrode, suitable for outdoor use
- Round sensitive membrane, easy to test the liquid PH
- Equipped with fibre junction, providing a stable reference potential.

### Features

Plastic combination pH electrode, suitable for outdoor use  
Round sensitive membrane, easy to test the liquid PH  
Equipped with fibre junction, providing a stable reference potential.

### Specifications

Model	PONPE 512PH
Range	0~14pH
Temperature range	0~100°C,32~212°F
Reference Type	Ag/AgCl
Junction Type	Annular Ceramic
Body Type	Glass
Dimensions	120(L)x12(Dia.)mm
