INSTRUMENTS

## Coating Thickness Gauge

# PONPE 411CFN

### Function

- It automatically measured on Steel, Galvanized Steel and Aluminum
- Probe is on 80 cm cable. Thanks to it measurement is easy in tight spaces
- Additional, our paint meter have layers and body filler sound signaling system and powerful flashlight

### Specifications

- Measurement of steel, galvanized steel and aluminum
- Layers sound signaling system
- Two modes: HOLD / CONTINUOUS MODE
- Big, Easy to Read, backlit LCD
- Calibration plate in set (easy calibration)
- Large measuring range from 0 nm to 1990 um
- Measuring resolution: 10 um
- Very comfortable probe on the cable (80 cm)
- Easy measurement in tight spaces
- Built-in LED flashlight
- 2 x 1.5 V Alkaline Battery (approx. 100 hrs. Working)
- Batteries included
- Low Battery indicator
- Automatic turn-off after 2 mins. of inactivity to save battery
- Operating temperature range: -20°C - +40°C (-4°F - 104°F)
- EU Product
- CE

### Set included

- 1 x Coating Thickness Gauge (main unit)
- 2 x 1.5 V AA Alkaline Battery
- Calibration Plate for Steel (Gray plate)
- Calibration Plate for Aluminum (Red plate)
- English User's Manual
